## PROJECTS

---

Business Website - [UnlockProspects.com](https://unlockprospects.com) Sep 2023

- Developed a fully functional website from scratch using HTML, CSS, and JavaScript.
- Utilized responsive design techniques to ensure optimal user experience across all devices.
- Implemented google form API to link the websites form.

CSC 220 - Java OOP II: Final Project Nov 2022 - Dec 2022

- Developed a text analysis program using Java.
- Program was designed to answer various questions. about the contents of a given text file, such as total number of words, frequency of a specific word, and most frequently occurring words.
- Filtered out common articles and perform basic preprocessing on the text, such as ignoring case, only counting alphanumeric words and compared two texts.
- Tested the program using Moby Dick and Alice in Wonderland book text files.
- Implemented six methods for the class, including a constructor and methods for parsing input text and article files.
